TECHNICAL EXPERIENCE

Personal Projects

- Java Code Generator Tool (Academic Major Project):** Through this tool user can create manual components in which they can enter interface details and after building it they can generate java classe.
- Swing app to create MySql user and db (Academic Minor Project):** Developed a tool through which user can directly create MySql Database as well as add user and it will also allow to grant all rights to that particular user.
- Log Reader (Open Source):** This program read from desired log file and display the contents on console. Whenever any changes occur to that particular log file it reflects the same on console and user does not have to reload that particular log files.
